If we have a feasible space for a given LPP (linear programming problem), how is it that its optimum solution lies on one of the corner points of the graphical solution? Explains the terminology and demonstrates the basic techniques for 'linear programming'; that is, for maximizing or minimizing a linear relation subject to certain ... In this lesson we learn how to solve a linear programming problem using the graphical method with an example. We also see an example for an in-feasible LP ... Linear programming (LP, also called linear optimization) is a method to achieve the best outcome ... An optimal solution need not exist, for two reasons.
